Blundall Associates, Inc., is a professional construction cost consulting and project management practice in its 30th year of providing services for a wide range of educational, commercial, institutional, and industrial projects. In a typical year we provide construction cost management and quantity surveying services for projects in excess of one billion dollars total value. Our construction cost estimates are prepared for new construction, renovations, remodels, historical restorations, civil and site development, and LEED® projects. We have provided services for projects in many states across the USA and Puerto Rico. We are a full-service practice; our in-house staff prepares estimates for all architectural, mechanical, and electrical trades.
